Skills

- CompTIA A+ certified.
- Bash: 5 years experience.
- C: 5 years experience.
- HTML/CSS/JS: 2 years experience.
- Python: 4 years experience.

Experience

Hannaford / Stock Clerk

FEBRUARY 2018 - PRESENT, OLD TOWN, MAINE

Arrange, organize, and restock product shelves quickly and efficiently. Place and receive orders in a timely manner while maintaining a high quality of work. Provide friendly and competent customer service.

Avalanche / Backend Developer

DECEMBER 2016 - JANUARY 2018, ORONO, MAINE

Developed web application backend in Django. Implemented a RESTful API for our web application using Swagger. Developed a suite of Python tools that interfaced with the API in order to provide extra application functionality and use all functions of the web application without needing a web browser.

University of Maine Advanced Computing Group / Researcher

JUNE 2015 - DECEMBER 2016, ORONO, MAINE

Initially hired only to develop and debug firmware in C for a medical device. Responsibilities quickly expanded to include product quality assurance, Windows and Linux server administration, Linux application development in both Bash and Python, and creation of bespoke Linux distributions, using both Ubuntu and CentOS as a base.

Education

University of Maine / Computer Science

JULY 2016 - DECEMBER 2016, ORONO, MAINE

Withdrew due to financial hardship.

Miscellaneous

- Have built a full enterprise-grade network, including email and web servers, DNS, VLANs, and firewalls, with redundancy, in a home lab setting.
- Have deployed both OpenStack and ESXi to manage virtual machines in a home lab setting.
- Currently experimenting with both Docker Swarm and Kubernetes for container management in home lab.
